PROFESSIONAL SUMMARY

A **Full Stack Developer** and **Computer Science Engineering student** with strong knowledge in building **scalable web applications**. Skilled in the **MERN stack**, **RESTful APIs**, and **MongoDB database integration**. Good understanding of **Data Structures and Algorithms (DSA)** and **problem-solving techniques**. Focused on developing **efficient** and **maintainable applications**.

SKILLS

Programming Languages: HTML, CSS, JavaScript, Java

Frontend: React.js, Bootstrap

Backend: Node.js, Express.js

Database and APIs: MongoDB, REST API

Tools: Git, GitHub, Postman, Netlify

PROJECTS

Game Store Web Application

[Live Demo](#)

- Developed a full-stack web application using **React**, **Node.js**, **Express**, and **MongoDB**, enabling efficient client-server communication and dynamic data handling.
- Integrated **RESTful APIs** and implemented a **responsive user interface**, improving usability and ensuring smooth performance across different devices.

Fitness Tracker

[Live Demo](#)

- Built a fitness tracking system using **Node.js** and **Express** to manage backend operations and efficiently handle user activity data.
- Utilized **MongoDB** for structured data storage and retrieval, ensuring scalability, consistency, and optimized application performance.

EDUCATION

AVS Engineering College

Bachelor of Engineering in **Computer Science and Engineering** with a CGPA of **7.8**.

CERTIFICATIONS

- Completed certification in **CUDA Python deployment** from ADVI Group.

ACHIEVEMENT

- Developed and deployed multiple **full-stack web applications** in **live production environments**.
